## REVIEW MEC SPE

Parma, Italien 28. - 30.03.2019

The MEC SPE trade fair in Italy is a leading trade fair for innovative solutions that facilitate production processes in all its phases. By participating with our own stand, we were able to make many interesting contacts and show the advantages of the KROMER balancers in the production process to the interested visitor.

A very successful trade fair is over for us and we would like to take this opportunity to thank our trade fair team for their outstanding commitment!

## IMPRESSIONEN:
